To whom it may concern,

In recent years we have utilised the service of On Site Recruitment Solutions and Antony Hampshaw for the supply of painters and carpenters on a temporary contract basis on various projects across Hampshire, the Home Counties and into London.

We have built a working relationship with Antony and On Site that allows us to have the confidence that they will supply the calibre of operative we require first time around, so as to reduce a high turnover of agency staff.

We are also confident that any operative supplied by On Site will also have their own tools and safety wear, and if necessary for that particular site, a valid CSCS card or certificate. We have never had to reject an On Site operative from site because they did not have the correct CSCS qualification.

Antony is always contactable and continually keeps in touch with our site teams or head office to ensure that his operatives are working ok and proving reliable.

We would have no hesitation in recommending the service of Antony and On Site to any company looking for a temporary labour and trades solution in the future.

Yours faithfully

Rob Martin
